

RUWANTHA MADHUSHAN

Mobile App Developer (Flutter)

Horana, Sri Lanka | 01ruwantha@gmail.com | 076-0018969 | linkedin.com/in/01ruwantha | github.com/01Ruwantha

SUMMARY

Passionate and results-driven **Software Engineer** and **Electronics & Computer Science undergraduate** with hands-on experience in mobile, web, and backend development. Skilled in building scalable, high-performance applications using modern technologies such as Flutter, Kotlin, React Native, React, Node, Spring Boot, and SQL/NoSQL databases. Strong foundation in object-oriented programming (Java, Swing), with a proven track record in real-world projects including e-commerce platforms, 3D game environments, and AI-based prediction systems. **Successfully published Flutter-based Calculator app, VRNT Engineers app on the Google Play Store.** Always eager to learn, innovate, and collaborate in dynamic software development environments.

EXPERIENCE

Mobile App Developer Intern · ARTecX Solutions

Dec 2025 – Jun 2026

Remote

- **Developed and maintained 6 cross-platform Flutter applications** across healthcare, e-commerce, flight booking, chat, and pet care domains.
- Built the **PawlyMark Doc** (Doctor App): implemented complex navigation (IndexedStack → PageView with nested routing), **integrated Firebase Cloud Messaging** (FCM) for push notifications on Android & iOS, and connected 15+ REST API endpoints using the Dio HTTP client.
- Built the **PawlyMark Seller App**: **implemented multi-language support across 6 languages** (English, Sinhala, Arabic, Hindi, Tamil, Japanese) using Flutter's .arb localization system and BLoC state management for dynamic locale switching.
- Developed the **Amano Air** flight booking app implementing flight search, seat selection, passenger details, and payment flow screens with Lottie animations.
- Built the **Card Chat app** using Tencent Cloud Chat UIKit and Riverpod state management, including real-time messaging, wallet integration, and OTP brute-force protection.
- Implemented **pet care user app** (PawlyMark User App) with full CRUD for pet profiles, food plans, medication records, and appointment history, including avatar image upload via multipart API.
- Initiated and developed the **ChatInPay app** featuring onboarding screens, QR/barcode scanning (mobile_scanner), AppDrawer navigation, and payment flow UI.
- Implemented responsive design across all applications using flutter_screenutil, replacing fixed dimensions with scalable units for consistent layouts across mobile and tablet devices.

PROJECTS

VRNT Engineers – Smart Billing & Invoice Generator

Developed and published a comprehensive billing application using Flutter, enabling users to generate professional invoices and bills instantly. The app streamlines the billing process with an intuitive interface, allowing users to create, manage, and share bills seamlessly. Features include local data persistence with Hive for offline access, smooth navigation with GoRouter, and WhatsApp integration for instant bill sharing with customers.

Tools: Flutter, Dart, Hive, Provider, Go_Router, Flutter Native Splash, Flutter Launcher Icons, Google Play Console, Local Storage

URI: <https://play.google.com/store/apps/details?id=com.vrnt.engineers>

Calculator – Modern Responsive Calculator App

Developed and published a feature-rich calculator app using Flutter and Hive, providing a seamless calculation experience across mobile and tablet devices. Features advanced math functions, local storage, and a responsive layout for all screen sizes.

Tools: Flutter, Dart, Hive, Google Play Console, Responsive Design, Local Storage

URI: https://play.google.com/store/apps/details?id=com.ceynext.calculator_app

Saloon Skip – Smart Salon Booking & Discovery Platform

Developed a feature-rich salon booking application using Flutter, enabling users to effortlessly discover, browse, and book appointments at nearby salons. The app provides a seamless experience with location-based salon discovery, real-time availability checking, and secure reservation management. Features include voice search, QR code scanning, favorites management, interactive maps, rating and review systems. Implemented JWT-based authentication with secure token storage, offline data persistence using Hive, and a responsive UI with dark/light theme support for a polished user experience across all devices.

Tools: Flutter, Dart, Hive, Provider, Go_Router, Google Maps Flutter, Geolocator, Speech-to-Text, Mobile Scanner, HTTP, Flutter Secure Storage, Image Picker, Cached Network Image, Responsive Design, Local Storage, REST APIs

QuickSlice – Food & Pizza Delivery Mobile App

Developed a full-featured, cross-platform food delivery app using Flutter. This solo project showcases end-to-end mobile app development, from UI/UX to backend integration. Features include real-time updates, role-based authentication, customizable orders, secure Stripe payments with currency conversion, automated email confirmations, and guest access mode.

Tools: Flutter, Dart, Firebase (Auth, Firestore, Storage), Hive, Provider, Stripe, GoRouter

Heart Disease Risk Assessment System

Developed a web-based machine learning app to predict heart disease risk using algorithms such as Random Forest, Logistic Regression, and SVM. Integrated Flask for real-time predictions and result visualization.

Tools: Flask, Python, HTML, CSS, Git

Banking Management System (Java)

Built a secure banking system with Java and Java Swing, focusing on user authentication, account management, and financial transactions.

Tools: Java (OOP, Swing), GitHub

Tech Gadget Store – E-Commerce Website

Developed a responsive tech gadget e-commerce web app demonstrating modern frontend design and smooth user navigation.

Tools: HTML, CSS, JavaScript, GitHub

SKILLS

Programming: Dart, Java (OOP, Java Swing), C#, C, C++, Python, JavaScript, PHP

Databases & Backend: MySQL, Firebase, MongoDB, PostgreSQL, Spring Boot, Node.js, Express.js

Web & Mobile Development: Flutter, Kotlin, React Native, React, HTML, CSS

State Management: BLoC, GetX, Riverpod, Provider

Tools & Others: GitHub, Figma, go_router, Dio, Firebase (FCM, Auth, Firestore), flutter_screenutil, Lottie, GetX

Game & 3D Development: Unreal Engine 5, Blender

EDUCATION

Bachelor of Science (Honours) in Electronics and Computer Science

Present

Department of Physics and Electronics, University of Kelaniya · Kelaniya, Sri Lanka

Diploma in English Language

2021

British Way English Academy · Kalutara, Sri Lanka · Merit Pass

G.C.E. Advanced Level (Combined Mathematics, ICT, Physics)

2020

Horana Royal College · Horana, Sri Lanka

ADDITIONAL INFORMATION

Languages: English, Sinhalese

Member – Electronics and Computer Science Club

University of Kelaniya · 2023 – Present

Member – Electronics Students' Society

University of Kelaniya · 2022 – Present
